1. BACKGROUND AND OVERVIEW OF THE PROJECT

1.1 INTRODUCTION

The Alfred Nzo District Municipality (ANDM) has favourable climatic conditions and is also highly endowed in land as a natural resource, suitable for the development of the Agriculture, Forestry and Fisheries Sector. This resource has however not been fully employed due to various challenges being experienced in the sector. The locality of ANDM is also faced with a substantial number of socio-economic challenges. The region is characteristic of extreme poverty & unemployment levels and low education & skills level. The Municipality has been implementing programmes that seeks to address the socio-economic encounters.

Winnie Madikizela Mandela Local Municipality (WMMLM) has an estimated population of 281 905 within an area covering 2 806 km² within the Alfred Nzo District Municipality. Mbizana has a largest population compared to other three municipalities under Alfred Nzo District Municipality. The Municipality is endowed with coastal belt that some communities rely on it for living. Mariculture is a small sector that benefits communities living along the coastal belt. Community level fishing and harvesting of marine resources also take place off the coast of Mbizana. It is however largely unregulated and there is an opportunity to start Mariculture farming initiatives which will largely deter illegal harvesting of marine resources.

It is also significant to indicate that the fishing is also practiced in inland areas like Ntabankulu, Umzimvubu and Matatiele Local Municipalities where fishing is also undertaken on the dams and rivers.

It is therefore against the abovementioned background that the Municipality is calling all competent and experienced Service Providers to procure, supply and deliver the fishing equipment's for fish farmers as per the BOQ

1.2 OVERALL AND SPECIFIC OBJECTIVES OF THE PROJECT

1.2.1 Overall objective

- The primary objective of this project is to equip small-scale fishers with modern, durable, and appropriate fishing equipment that will improve their productivity, efficiency, and sustainability of their fishing practices.

1.2.2 Specific Objectives

Specific objectives of the initiative includes:

- Implementation of an Oceans and Inland Development Project as per the specification provided in the table below.
- Empower local small-scale fish farmers with the resources necessary to engage in sustainable and efficient fishing activities.
- To provide small-scale farmers with fishing equipment.
- Creation of sustainable business entities that will also create job opportunities.
- Farmers graduating from small-scale, subsistence to commercial fishing and eventually joining the mainstream economy.
- To alleviate poverty within ANDM through Mariculture activities.
- To exploit the District's competitive advantage while ensuring economic growth in the District.

2. SCOPE & EXTENT OF WORK

Bids are invited from suitable qualified professional service providers to procure and supply fishing equipment to small-scale fishers for Oceans and Inland Development Project within the Alfred Nzo District Municipality as per the BOQs below.
