1. BACKGROUND AND OVERVIEW OF THE PROJECT

1.1 INTRODUCTION

The Directorate of Community Development Services – Environmental Management and Water Quality in Alfred Nzo District Municipality (ANDM) is developing effluent management plan for Ntabankulu and Mount Ayliff waste water treatment works. Municipal Systems Act 32 of 2000 emphasizes on the role of the municipality to provide clean and safe environment that will promote sustainable development.

1.2 OVERALL AND SPECIFIC OBJECTIVES OF THE PROJECT

1.2.1 Overall objective

The objective of this project is to conduct effluent management plan for Ntabankulu and Mount Ayliff WWTWs in ensuring good effluent supply practice, minimization of contamination of water sources, reduction or removal of contamination during storage, distribution and handling of drinking water.

1.2.2 Specific Objectives

The main objectives of the plan are:

- To ensure that effective procedures are implemented for handling, storage and disposal of waste that is generated from the activities on site.
- To promote re-use recycling and recovery of sludge waste.
- Development of an understanding of specified system and its capability to supply water that meets health-based targets.
- Identification of potential sources of contamination and how they can be controlled.
- Validation of control measures employed to control hazards.

- Implementation of a system for monitoring and control measures within the water system.

2. SCOPE & EXTENT OF WORK

Quotations are invited from suitably qualified professional service providers to prepare and submit proposals to undertake the following:

- System technical design
- OH&S requirements.
- Activated sludge and Pond Management strategies.
- Labor requirements
- Contingency plans for breakdowns
- Effluent volumes
- Describe how well current system addresses current needs.
- Implementation plan and financial mechanisms

3. PROJECT TIME FRAME

The project time frame will be 4 months from the date of appointment of the service provider

4. KEY OUTPUTS/PROJECT MILESTONES/DELIVERABLES

- Monitoring and contingency plan
- Scientific and Engineering assessment report
- Environmental quality objectives
- Monthly progress reports submitted and presented at Project Steering Committee meetings.

- Close out report with appropriate recommendations and an indication of jobs created in the project.

5. STAKEHOLDERS CONSULTATION

Through consultation between the service provider and the District Municipality, the service provider will provide scientific and technical guidance, while municipality of ANDM will be responsible for undertaking the stakeholder consultation where necessary.

6. PROJECT MANAGEMENT

The appointed service provider will take responsibility of the work. The client will deal with the contracted service provider. The project is to be coordinated and managed by Environmental Management team led by Alfred Nzo District Municipality.

A Project Steering Committee (PSC) made of ANDM officials and other key stakeholders will oversee project implementation and facilitate inter – governmental coordination. The ongoing plans and progress reports from the appointed service provider will have to be submitted to the Project Operational Team Leader and or Project Steering Committee where a process of verification will take place prior to the approval of invoices submitted by the service provider. Ideally prior to the sitting of a PSC meeting, a technical verification of work claimed by the service provider, must be undertaken by ANDM project management team to ensure that ANDM is able to approve claims made by the service provider.

7. REPORTING MECHANISM

It is expected that regular progress reports will be submitted to ANDM and further presented to the PSC on a monthly basis. The Project Manager has the right to change the frequency of reporting as and when necessary.
